

**Petition Letter:**

**Give Hope and Homes to Haiti's Earthquake Victims**

Greetings,

I just signed the following petition addressed to: Haiti's President, Prime Minister and Parliament.

-----

Give Hope and Homes to Haiti's Earthquake Victims

We are outraged that, despite the outpouring of international generosity in the post-earthquake months, more people live in camps in Port-au-Prince than in the city of Miami. We join Haitians in calling for a solution: affordable housing.

We call on you to immediately halt all forced evictions and ensure that camps for internally displaced people, on private or public land, are not destroyed or closed until public or affordable housing is available.

Haitians have spent over two years in horrific conditions and are asking for homes. We urge you to designate land for housing, make construction materials available and affordable, create one centralized government housing institution to coordinate and implement a social housing plan, and allocate the funds necessary to realize this plan.

We stand with those who are *bouke viv anba tant*—tired of living in camps - and we will stand with them until they have homes.

-----

Sincerely,

[Your name]
