Claim: Justice and Reparation

President:

This letter serves as a painful reminder that my rights are equal to all others' rights and are not superseded by the rights of any other entity including State powers of any kind.

On January 10, 2013, my child Mathieu Markenson fell ill in the middle of the night; the symptoms included vomiting, intense diarrhea and stomachache. I live a very long distance from the hospital, in the Fe Woyj district, and consequently I had to rent a moto to get there.

When I arrived at the hospital there were some difficulties with introducing the IV. I did not know which Saint to plead to. But by the grace of God was my child's life spared.

I heard that MINUSTAH came to assist us. That's not true. MINUSTAH brought complications. It is MINUSTAH that brought us cholera, a disease which was unknown to us until their arrival. Consequently I am asking for justice and reparation.

Regards,
