OWNING OUR FUTURE – HAITIAN PERSPECTIVES IN FILM

Join us for a screening and discussion of short films made by Haitians during a training and production process led by Boston-based Community Supported Film.

Haitian documentary filmmakers, with backgrounds in journalism, theater and poetry, provide a unique opportunity to experience Haiti as it is lived by street vendors, business women, artists, farmers and more. Their stories nourish an understanding of Haiti that goes beyond the western media's focus on crises and disasters.

Community Supported Film believes that locally produced stories help us better understand foreign events, diverse cultures and people's complex realities. Learn more and see excerpts of the films at www.csfilm.org.

Light refreshments will be provided.

For more information, or to RSVP, contact Sarah Chapple-Sokol at 617-542-7654 extension 36.
