

_chris_osman_designs Sometimes life is stranger than fiction and filled with crazy adventures. I am alive and back home. We all are. -

Its now known that I do security work and have done it for years. My days of doing any out of the U.S. is officially over because I'm plastered all over media around the world. -

The team was in Haiti to provide security work for people who are directly connected to the current President. We were being used as pawns in a public fight between him and the current Prime Minister of Haiti. The people of Haiti were really good to us and all of us will forever be thankful to the ones in the jail who helped us. The jails are awful with conditions I wouldn't wish for anyone to experience. -

We were not released we were in fact rescued. To the men who risked their lives to do so: you boys are getting some serious care packages!!! We owe you our lives. -

Thank you to the American government, the State Department, the U.S. Embassy in Haiti, The American Ambassador to Haiti, and the hundreds of men and woman who stepped in to save us. -

It's been a long time since I have seen the weight of the U.S. government at work and it's a glorious thing. -

Thank you to the hundreds of people, family, and friends who reached out to my wife to help her during this difficult time. -

To my "H8ti" Brothers Thank you for never wavering under the conditions and always having each others backs. I love all of you.
